PLUTO SECURPLATE

secure universal projector mount

Top-Tec have a long history in providing affordable and unobtrusive AV solutions with a comprehensive range of quality projector mounts. These have cemented our position as the premier manufacturer of secure projector mounts in the UK and Europe.

Key Features

- Universal design available in two sizes
- Quick release with key
- 35° tilt and 360° rotation
- Attach to standard 50mm diameter column
- Drill resistant locks
- Security cable holes
- Durable black finish
- Simple to install

Cost Effective

The Pluto SecurPlate is manufactured with both security and ease of use in mind and reduces the risk of theft whilst assuring retention of full projector functionality, thus making it a sound investment. Utilising Top-Tec's innovative fixing system, the SecurPlate is able to accommodate most mounting hole patterns, therefore eliminating the extra cost and inconvenience of special fixings.

Flexible Design

Manufactured in two sizes, the SecurPlate is able to cater for all major AV manufacturers' projectors. The unique Top-Tec ball swivel system means that once fitted, the SecurPlate can be rotated through 360° and has a maximum tilt of up to 35° in all directions. They are designed to work with a 50mm diameter column as standard, although Top-Tec can supply adaptors to accommodate various other systems.

Anti-Theft

Anti drill locks and a strengthened frame ensure that once fitted and locked, the SecurPlate provides a level of security rarely associated with this type of mount, setting it apart from other products in the market today.

Full range of columns, ceiling plates and accessories are also available to satisfy all your installation needs.
